

Sitemap and Robots

What Is a Sitemap?

A sitemap is a file that lists all the important pages on a website. It guides search engines in determining which pages to include in their index.

Having a sitemap is an important part of SEO. Sitemaps help Google discover your pages faster and more effectively.

Types of Website Sitemaps

XML sitemaps: sitemaps written in a specific format designed for search engine crawlers

<https://domain.com/sitemap.xml>

HTML sitemaps: sitemaps that look like regular pages and help users navigate the website

<https://domain.com/sitemap.html>

Robots.txt

Robots.txt is a website file that tells search engine crawlers which sections of the website to crawl and which to avoid.

You should place it in the root folder of your site:

`https://domain.com/robots.txt`
