Technical SEO

Website: https://marasimarine.net/

## 1) SEO-Friendly Site Architecture

Architecture is not SEO friendly because pages is **not** proper indexing according to their website submenu

Solution:
Need to arrange according to Following image

2) Submit Your Sitemap to Google
- Sitemap structure is okay

3) Use HTTPS

- **Done (**website have SSL certificate**)**

4) Page Speed

- Need to improve website performance

5) Your Website Is Mobile-Friendly
- **YES**

6) Breadcrumb Navigation
- Breadcrumb Navigation is okay and show in every pages but when change website architecture (SEO Friendly Architecture) than we need to check again but as of now it is **okay**

7) Broken Pages (404 Pages)

- from all 273 links there are **3 links** have issue

8) Check Indexing of Whole Website
  - **I think Site is not proper indexing on google**
